UNDP modelling estimates that minigrids will be the lowest-cost approach to bring electricity to 265 million people in AMP's 21 countries by the year 2030. The

ABB's microgrid installation in Johannesburg comprises its compact and versatile PowerStore battery-based grid stabilising system to address frequency and voltage fluctuations.

ABB is installing an integrated solar-diesel microgrid at its Longmeadow premises in Johannesburg, South Africa. The 96,000 m² facility houses the company's country headquarters as well as medium

Most recently ABB installed an integrated solar-diesel microgrid at its Longmeadow premises in Johannesburg, South Africa. The 96,000 square meter facility houses ABB's South

On Tuesday, global power and automation firm ABB commissioned a 750kW integrated solar photovoltaic (PV)-diesel microgrid at a facility in

Bringing a modern, sustainable technology solution to a historically significant site, ABB has provided a microgrid system to integrate solar energy

Technologie trakcyjne ABB zostaną wykorzystane do zasilania nowego szybkobieżnego połączenia kolejowego Gautrain w Południowej Afryce, które połączy Johannesburg, Pretorie i największe w

Microgrids can integrate multiple distributed generation sources including conventional diesel and gas, and/ or renewables such as solar photovoltaic (PV), wind, hydroelectric, tidal and even thermal

Zurich, Switzerland, June 8, 2016 - Innovative solar-diesel solution provides continuity of power supply for ABB's premises in Johannesburg and helps reduce carbon emissions ABB today commissioned

ABB's CEO, Ulrich Spiesshofer, sees microgrids playing a vital role in sustainable modernization.

ABB Microgrid Poludniowa Afryka

"Microgrids have enormous potential in Africa, where

There are thousands of facilities that could leverage such a microgrid solution to address the matter. ABB's microgrid installation in Johannesburg comprises its compact and versatile

Greater access to electricity and a reliable energy supply could play a key role in accelerating development across Africa. By integrating renewable energy resources like sun, wind and hydro into

ABB's Microgrids Solution minimizes the consequences of extreme weather or malicious physical or cyber-attacks, helping our customers to be prepared for

Zgodnie ze specyfikacją jednego z projektów, ABB wymieni oraz będzie obsługiwać aparaturę łączeniową zapewniającą bezpieczną obsługę aparatury rozdzielczej w trzech podstacjach oraz

ABB said there are "thousands of facilities" across South Africa and the continent that could turn to microgrid technologies to address challenges such as power shortages, fossil fuel price
